A better environment inside and out.™

Solar Gard® NightSky window film provides the utmost optical clarity for stunning exterior views day and night. This is due to low interior and exterior reflection, which reduces reflectivity to increase clarity. With a warm dark tone, NightSky sets the stage for your viewing pleasure.

NightSky offers protection from the sun's damaging ultraviolet rays and controls heat from the exterior to increase comfort and reduce the cost of air conditioning. By controlling hot spots and uneven temperature zones while controlling glare, it eliminates the need for blinds or shutters.

Night Sky comes in three versions, 10, 20 and 30 to provide you with a choice in visual appearance. With a limited lifetime residential and 10 year commercial warranty you can be assured that the film will last and last. NightSky is made by one of the worlds leading manufacturers in quality and performance.

Why NightSky will be perfect for your home or business:

- Low internal and external reflection giving you great views from your windows day or night
- Reduction of the entry of radiant heat, decreasing air conditioning costs, while reducing carbon emissions
- Warm dark tone gives glass a pleasing appearance

NightSky is ideal for office buildings to preserve the view whether day or night.

NightSky Feature

- Low internal and external reflection
- Solar heat protection
- Warm dark tone
- Blocks up to 98% of UV
- Limited lifetime residential and 10 year commercial warranty

Benefit

- Provides you with superior external viewing day or night
- Decreases energy costs
- Improves comfort
- Reduces hotspots
- Reduces glare
- Gives glass a pleasing appearance
- Protects expensive artwork, precious artifacts, expensive antiques, carpets and furniture from damaging UV rays
- Protects against premature aging and skin cancer, even while indoors
- Guarantees you a minimum length of service

Product Performance

NightSky films offer the following performance on 3mm glazing:

Glazing Description	Solar Energy Transmittance (%)	Total Solar Energy Absorbance (%)	Solar Energy Reflectance (%)	Visible Light Transmittance (%)	Visible Light Reflectance Exterior (%)	Visible Light Reflectance Interior (%)	Emissivity	Winter U-Factor (W/m ² °C)	Shading Coefficient	Solar Heat Gain Coefficient	Solar Selectivity Index-Luminous Efficacy (VLT/SC)	Light to Solar Heat Gain Factor (VLT/SHGC)	Ultraviolet Blocked (%) (@ 300 to 380 nanometers)	Total Solar Energy Rejected (%)
NightSky 10	16	71	13	10	16	14	.87	5.99	.44	.38	.22	.25	>98	62
NightSky 20	24	65	11	20	13	12	.86	5.96	.51	.43	.40	.46	>97	57
NightSky 30	35	56	9	32	10	9	.88	6.02	.61	.52	.52	.61	>95	48
